Seria Stiințele Vieții
(Life Sciences Series)

Volume 29, issue 2 Apr. - Jun. 2019

CONTENTS

- | | |
|--|--|
| <p>53 The digestive tract of the False Upside Down Catfish (<i>Synodontis nigrita</i>) from River Benue Nigeria: A micro-morphological investigation
Ikpegbu E., Ibe C. S., Nlebedum U. C.</p> <p>65 Spatial-temporal change of land surface temperature using satellite remote sensing data
Wutthisat C.</p> <p>70 The use of macrophyte <i>Typha latifolia</i> filters in the treatment of wastewaters of Medjerda River, in Souk-Ahras City (North-East Algeria)
Nedjma M., Nedjoud G., Fadila K.</p> <p>82 Growth inhibition and oxidative stress in the freshwater ciliate <i>Paramecium</i> sp. Exposed to copper oxide nanoparticles
Bouraiou C., Berrebbah H., Djekoun M., Bouarroudj T., Yahyaoui A., Khene L., Kahli H., Djebbar M. R.</p> | <p>91 Physico-chemical parameters, primary productivity and phytoplankton assemblage of Dandaru Lake, Southwestern Nigeria
Ayoade A. A., Izah B. C.</p> <p>99 Instructions for authors</p> |
|--|--|

COVER IMAGES

Upper-left image: Section of the middle intestine lined by simple columnar epithelium (red arrow) containing mucous cells (white arrow) and lymphocytes (black arrow). Note the laminar propria (LP), submucosa (S) and tunica muscularis (TM). H & E, (Scale bar = 40µm). (vol. 29, iss. 2, fig. 14., p. 61)

Upper right top image: Section of the distal intestine lined by simple columnar epithelium (red arrow) containing mucous cells (white arrow) and lymphocytes (black arrow). Note the laminar propria (LP), submucosa (S) and tunica muscularis (TM) showing onion shaped bulging of inner circular muscles (B) . H & E, (Scale bar = 40µm). (vol. 29, iss. 2, fig. 15., p. 61)

Upper right bottom image: Transverse section of the cardiac stomach lined by simple columnar epithelium (red arrow) containing lymphocytes (white arrow). Note the gastric glands (GG), in the laminar propria; muscularis mucosae (black arrow) and submucosa (S). H & E, (Scale bar = 40µm). (vol. 29, iss. 2, fig. 9., p. 58)

Far left middle image: Section of the Pharyngeal pad epithelium with higher magnification showing stratified squamous cells epithelium (red arrow) containing taste buds (white arrow head), eosinophilic club cells (white arrow), and mucous cells (black arrow). Note the blood vessels (BV). H & E, (Scale bar = 40µm). (vol. 29, iss. 2, fig. 6., p. 56)

Far left bottom image: Section of the proximal intestine lined by simple columnar epithelium (red arrow) containing mucous cells (white arrow) and lymphocytes (black arrow). Note the laminar propria (LP), submucosa (S) and tunica muscularis (TM). H & E, (Scale bar = 40µm). (vol. 29, iss. 2, fig. 13., p. 60)

Middle row top image: Section of the lower jaw showing the epithelium (red arrow), prominent elastic cartilage (black arrow) and skeletal muscle fibres (white arrow). Note the cavity lined by epithelial in-folding (white arrow-head). H & E, (Scale bar = 40µm). (vol. 29, iss. 2, fig. 3., p. 55)

Middle row middle image: Section of the Upper jaw lined by stratified squamous epithelium containing eosinophilic club cells C, lymphocytes, and mucous cells (white arrow). Note melanophores (black arrow) in the laminar propria/submucosa (LP/SB). Note the wide submucosa. H & E, (Scale bar = 40µm). (vol. 29, iss. 2, fig. 1., p. 54)

Middle row bottom image: Section of the lower jaw lined by stratified squamous epithelium containing eosinophilic club cells (C), lymphocytes, and mucous cells (white arrow). Note large infiltrating lymphocytes (white arrow head) and blood vessel (red arrow) in the laminar propria/submucosa (LP/SB). H & E, (Scale bar = 40µm). (vol. 29, iss. 2, fig. 2., p. 54)

Far right top image: Section of the fundic stomach lined by simple columnar epithelium (red arrow) containing lymphocytes (white arrow). Note the gastric glands (GG), in the laminar propria; muscularis mucosae (black arrow) and submucosa (S). H & E, (Scale bar = 40µm). (vol. 29, iss. 2, fig. 10., p. 58)

Far right middle image: Section of the rectum lined by stratified squamous epithelium (red arrow) containing mucous cells (white arrow) and lymphocytes (black arrow). Note the laminar propria (white arrow head), submucosa (S) containing pockets of skeletal muscle fibre (SKM) and blood vessels (BV). H & E, (Scale bar = 40µm). (vol. 29, iss. 2, fig. 16., p. 62)

Far right bottom image: Transverse section of the cardiac stomach lined by simple columnar epithelium (red arrow) containing lymphocytes (white arrow). Note the gastric glands (GG), in the laminar propria; muscularis mucosae (black arrow) and submucosa (S). H & E, (Scale bar = 40µm). (vol. 29, iss. 2, fig. 9., p. 58)
